

## WHAT IS

# MAS Certified Green?

MAS is a testing laboratory that offers the same certification testing process and standards as Greenguard. Because they are a smaller, independent lab they are not as well known as Greenguard – but there is no difference in the testing or assurance offered by either company. Learn more about MAS at [www.mascertifiedgreen.com](http://www.mascertifiedgreen.com).

### Greenguard™

### vs. MAS® Certified Green

- Tests for emissions via chamber method
- Qualifies products for LEED credits
- Offers transparent testing process whereby clients are free to observe
- 3rd Party Certification

- Tests for emissions via chamber method
