

Friant & Associates LLC is pleased to offer support in the specification of our products. Please note that this support does not represent acceptance of liability and responsibility on the part of Friant & Associates LLC associated with specification accuracy or completeness. While every attempt is made to ensure the quality and accuracy of specification services provided, it is the responsibility of the dealer to verify that specifications are accurate and complete. Friant & Associates LLC expressly denies any responsibility or liability associated with errors and/or inaccuracies in specification.

For example, it is the sole responsibility of the dealer to review workstation and cluster dimensions against the site dimensions to ensure accurate workstation placement and fit. The dealer accepts responsibility for design, programming, measurements, stability rules and other factors involved in the drawings and supplementary information submitted to Friant in order for us to provide drawings and specification support.

The placement of a purchase order referencing specifications prepared by Friant & Associates LLC shall imply that the dealer has carefully reviewed the drawings and has approved all specifications as being accurate and complete.

It is the policy of Friant & Associates LLC to provide up to two (2) revisions on any given project. All revisions thereafter will be reviewed on a project-by-project basis to determine under which parameters future revisions will be handled. Friant & Associates LLC reserves the right to propose an hourly charge of \$70 per hour for these additional revisions.

Standard lead time for most projects is 48-72 hours, although larger projects may require longer lead times. Please inquire for confirmation at the time of submitting your project.
