

Product Care & Maintenance

With regular care and maintenance, your Friant furniture will provide years of superior performance and satisfaction. To maintain the finish quality of your Friant products, please follow the cleaning procedures provided.

The instruction for the care and maintenance of Friant products are provided to you as a service. No warranty is implied, since we cannot monitor the methods and materials used for maintenance.

FROSTED GLASS: CLEANING & PRECAUTIONS

To clean the frosted glass surface use a slightly damp soft cloth and wipe gently.

Do not use a scouring pad, wipe the frosted surface heavily, or clean with any coarse substance/fluid, as this may cause the frosted glass to become smooth and transparent. Be sure to protect the frosted glass from any cleaning substance used for the aluminum frame as it may damage the finish.

MAINTENANCE

If you find any substance caught between the aluminum and glass, there are two solutions we recommend:

1. Gently use a firm piece of paper or PVC to retrieve it.
2. Hold the frame in your hands, over a carpet or cushion for protection, and shake carefully until it releases.
