Ordering Verity: Elements

Verity benching can be ordered as Elements.
See below for further details about Elements and a guide on how to order.

Elements

Elements are parts to build a larger and more customized complete unit. They are not freestanding, must be combined with other elements, and require ordering supports separately. An Element consists of structure and worksurface only.

There are three types of Elements:
- Starter/End Elements
- Extension Elements
- SA Elements (Stand Alone)

* Starter/End Elements are required at both the start and end of every run. Extension Elements are used anywhere between the Starter and End Elements.
* Support options for Elements include legs, pedestals, cabinets or credenzas.
* Additions, such as storage and accessories, are not included and need to be ordered separately.
* Available single-sided or double-sided, either non-powered or powered.
* Verity runs should not exceed 25'

How to Order Elements

1 **Build a run with Starter/End and Extension Elements.**

First, select a Starter/End Element to start the run.
Next, select one or more Extension Elements to extend the run.
Last, select a Starter/End Element to end the run.

Powering Verity

A guide to ordering electrical components for Verity benching.
See below for further details about running electrical/data.

Connecting to Power

Power can be brought in 3 different ways, which are all shown below.
Select the option that best fits the needs of the space and order from the components shown on page 33.

Figure A

- **Wire Manager + Infeed**
  connect power anywhere along the run and use the wire manager to conceal wires.

- **Power Pole**
  may be used only at the start or end of a run.

- **Enclosed Center Leg + Infeed**
 connect power at the center of a run and conceal wires inside the leg.

Power Distribution

To bring power from one Element to another, order a 4-circuit power jumper.

Power Jumper for 96"W Elements
When connecting power for a 96"W element, use 48"W jumper.

96" wide elements require a 48" power jumper in the center in addition to the jumper connecting adjacent elements.
